

Hydrotherapy for Dogs

Gentle, low-impact support for strength, healing, and mobility.

What is Hydrotherapy?

Hydrotherapy uses the supportive properties of water to help dogs exercise with less impact on their joints. It can improve strength, mobility, endurance, and confidence while supporting recovery and long-term wellness.

Benefits of Hydrotherapy

- ✓ Low-impact exercise for sore or stiff joints
- ✓ Helps build muscle strength and endurance
- ✓ Supports post-surgical rehabilitation
- ✓ Improves mobility, flexibility, and coordination
- ✓ Encourages weight management and conditioning
- ✓ Can reduce discomfort and support confidence in movement

Dogs Who May Benefit

- Arthritis or degenerative joint disease
- Hip dysplasia or elbow dysplasia
- Post-operative recovery
- Neurologic conditions and weakness
- Senior dogs needing gentle conditioning
- Sporting or active dogs needing cross-training and recovery

Why Pet Owners Love It

- ✓ Gentle and well-tolerated
- ✓ Customized to each dog's needs
- ✓ Complements rehab and chiropractic care
- ✓ A supportive, confidence-building experience

Hydrotherapy can be a wonderful part of a personalized wellness plan.

Ask how hydrotherapy may support your dog's comfort, recovery, and quality of life.

Holistic care. Advanced therapies. Happier pets.
